ACKNOWLEDGEMENT

At this pleasing moment of having successfully completed our project report, we wish to convey our sincere thanks and gratitude to our beloved Pro-Chairman **Thiru R.S.K. Raguraam** and Chairperson **Tmt. K. Dhanalakshmi** who provided all the facilities to us.

We would like to express our sincere thanks to our beloved Principal **Dr. D. Vasudeven** for supporting the successful completion of the project.

We are also grateful to our Head of the Department and project coordinator **Dr. A. Vincent Antony Kumar** for his constructive suggestions and encouragement during our project work.

We whole heartedly acknowledge the words of inspiration given by our Internal Guide **Mrs. A. Sangeetha**, Asst. Prof. for successfully completing this project work.

Finally, we would like to thank the almighty with whose blessings it has been possible for us to complete our project.

ABSTRACT

LiveDocs is a decentralized, real-time collaborative document editor designed to enable seamless and efficient collaboration without reliance on centralized servers. Unlike traditional cloud-based solutions such as Google Docs, LiveDocs utilizes WebRTC for direct peer-to-peer (P2P) communication and Yjs (Conflict-Free Replicated Data Types: CRDTs) for distributed data synchronization. This architecture ensures low-latency collaboration, enhanced fault tolerance, and seamless scalability, supporting millions of concurrent users. Key features include real-time editing, role-based access control, and instant notifications, all powered by a resilient P2P network. Secure authentication is ensured through JWT-based access control, enabling efficient document indexing and user management while delivering a modern and sleek user experience. By eliminating centralized infrastructure, LiveDocs reduces server costs, enhances scalability, and improves fault tolerance, making it an ideal solution for teams, enterprises, and large-scale applications requiring secure and real-time document collaboration.

Keywords:

Peer-to-Peer Collaboration, Real-Time Document Editing, WebRTC, CRDTs (Yjs), Decentralized Collaboration, JWT Authentication.

TABLE OF CONTENTS

CHAPTER NO.	TITLE	PAGE NO.
	ABSTRACT	iv
	LIST OF FIGURES	vii
1.	INTRODUCTION	1
	1.1 BACKGROUND AND MOTIVATION	1
	1.2 PROBLEM STATEMENT	1
	1.3 OBJECTIVES AND CONTRIBUTIONS	2
2.	LITERATURE REVIEW	3
	2.1 OVERVIEW OF EXISTING SYSTEM	3
	2.2 LIMITATIONS OF CURRENT APPROACH	4
	2.3 POSITIONING OF THE PROPOSED WORK	5
3.	SYSTEM ARCHITECHTURE	6
	3.1 OVERVIEW OF LIVEDOCS	6
	3.2 ARCHITECHTURAL DESIGN	6
	3.3 DATA SYNCHRONIZATION USING YJS	8
	3.4 AUTHENTICATION AND ACCESS CONTROL	8
	3.5 SCALABILITY AND FAULT TOLERANCE	8
4.	IMPLEMENTATION DETAILS	10
	4.1 TECHNOLOGY STACK	10
	4.2 BACKEND IMPLEMENTATION	10
	4.3 FRONTEND IMPLEMENTATION	11
	4.4 PEER-TO-PEER COMMUNICATION WITH WEBRTC	12
	4.5 DATA CONFLICT HANDLING WITH CRDTS	12
	4.6 PROTOTYPE DEMONSTRATION	13
5.	PERFORMANCE EVALUATION	16
	5.1 LATENCY	16
	5.2 SCALABILITY	16
	5.3 SYNCRONIZATION ACCURACY	17
6	DISCUSSION	18

	6.1	STRENGTHS OF LIVEDOCS	18
	6.2	LIMITATIONS AND CHALLENGES	19
	6.3	FUTURE ENHANCEMENTS	19
